Eradication of Jiggers

03/07/2018

HALF YEAR JIGGER REPORT FROM JANUARY TO JUNE 2018.

Our dream of reaching 20,000 mark this year 2018 is very close because we have done a lot since January 2018. We started on a low note but we have been able to climb up every month.

Total January to June is ten thousand one hundred and eighty three. 10,183

We have given out 600 pairs of new school shoes to 600 previous jigger victims and 1,200 pairs of socks since January 2018 to June 2018 and this is a continuous process that is still on going. Soap giving is also another program we introduced in schools and we give out to every child that we treat. We have sprayed (fumigated) many homesteads and in every school that we treat so far. Some of the jigger parasites are found in dusty places and underneath some trees in this part of Kenya thus the need to spray.

Thanks to Wir helfen in Africa for their tireless and continuous support towards this worth course.
